

WindPro® Hurricane Banner Bracket Warranty

WindPro® Hurricane Banner Brackets are warranted for five (5) years, from the date of invoice against defects in material and workmanship when installed according to WindPro Hurricane installation instructions, banding guidelines and when used to support banners 30" x 96" or smaller.

We recommend the use of Band-It® stainless steel banding (# C206) or equivalent on our Hurricane brackets. The banding should be wrapped twice around the pole and casting assembly before clamping the buckle. Brackets should be inspected 30 days after initial installation and every 60 days thereafter, immediately making adjustments as needed. This warranty does not apply when installation performed and/or equipment used is contrary to WindPro's® specifications and instructions, nor where equipment is altered or modified. Excessive force, i.e. hammering bracket into place is not necessary, will damage the castings and void the warranty. This warranty does not cover installation or removal costs incurred by customer. WindPro Hurricane Brackets are warranted to withstand wind gusts up to 70 MPH when used with banners measuring 30" wide by 96" or smaller.

WindPro Hurricane Brackets sold with screw gear banding are warranted for a period of two (2) years from the date of invoice against defects in material and workmanship.
