# IG-118x96_BRG48L Setup Instructions
# Show Labor Recommended

Part 1: Setup Main Backwall

1.) Place frame flat on the floor paring like numbers. Assemble sides with small connector bars in outside channels & tighten screws. Be sure to connect Barrel Electrical Connectors at each respective joint.

2.) Assemble corners using corner brackets inserted into outside channels of frame. Tighten thumb screws.

3.) Assemble vertical support bars using large connector bar & tighten screw. Insert vertical bars in to marked location on frame.
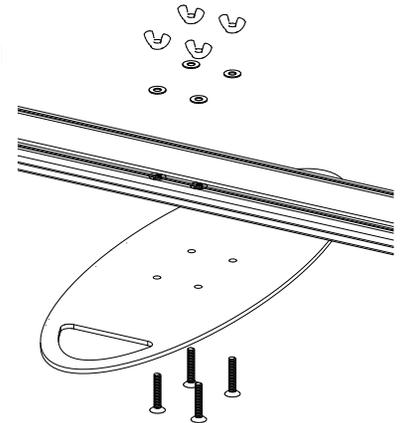

**4.)** Install Horizontal support bars into to marked location on frame & tighten Tension Lock

• Turn Tension Lock to the right with T-30 tool to tighenten lock into channel

5.) Assemble base plates to the bottom of the frame using the supplied bolts, washers, & wingnuts. Stand the frame up.
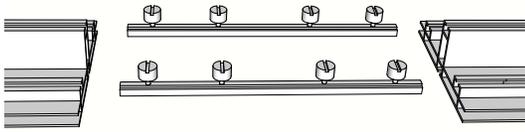

6.) Place SEG Graphic on the front and rear of the frame following the instructions on the last page of the instruction manual.
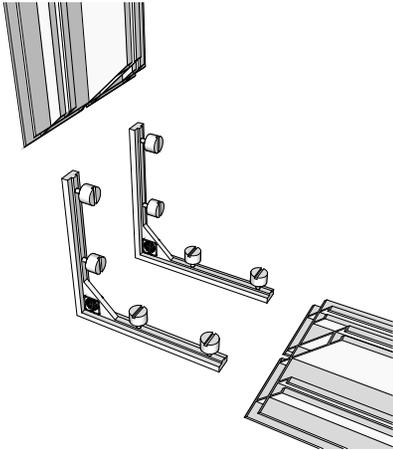

Part 2: Setup Front Display

1.) Place frame flat on the floor paring like numbers. Assemble sides with small connector bars in outside channels & tighten screws. Be sure to connect Barrel Electrical Connectors at each respective joint.
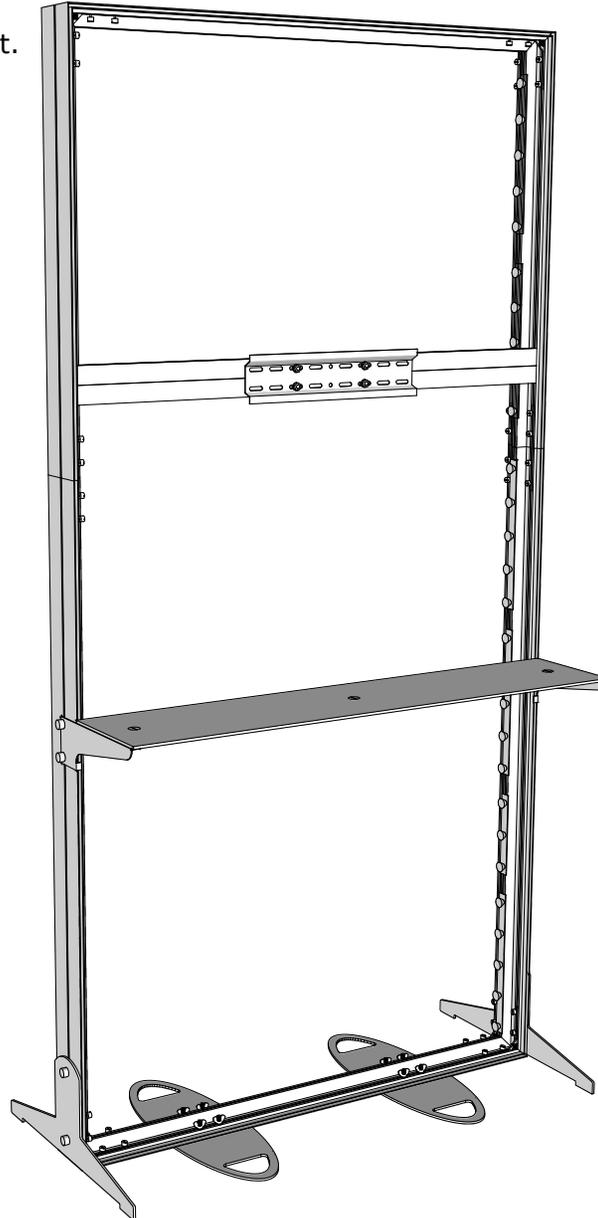

2.) Assemble corners using corner brackets inserted into outside channels of frame. Tighten thumb screws.
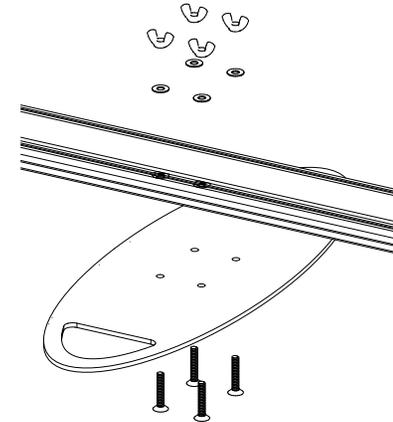

3.) Install Monitor Bracket support bars into Front channel of frame and tighten Tension Lock

• Turn Tension Lock to the right with T-30 tool to tighenten lock into channel

4.) Assemble base plates to the bottom of the frame using the supplied bolts, washers, and wingnuts. Stand the frame up.

5.) Place SEG Graphic on the front of the frame following the instructions on the last page of the instruction manual.

6.) Adjust TV Bracket if necessary to align with slits in the front graphic. Place SEG Graphic on the Back of the frame following the instructions on the last page of the instruction manual.

Part 2: Setup Front Display

7.) Install side support feet on onto side of frame by inserting the T-Bolt into the center grove and tighten the knurled thumb screw.
NOTE: FOR STABILITY SIDE SUPPORT FEET MUST BE IN PLACE UNLESS USING IN A BRIDGE CONFIGURATION.

T-Bolt •

Side Support foot. •
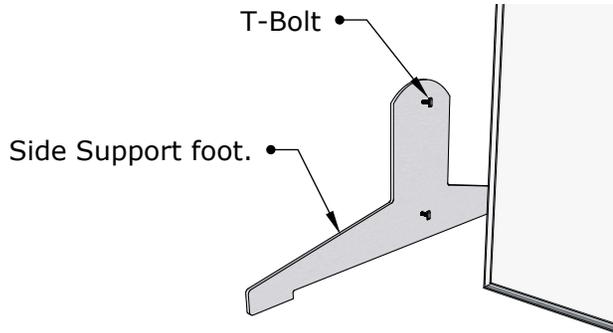

8.) OPTIONAL SHELF: Install a side shelf bracket on each side by inserting the T-Bolts into the center grove and tighten the knurled thumb screw.

• Side Shelf Bracket

• T-Bolt
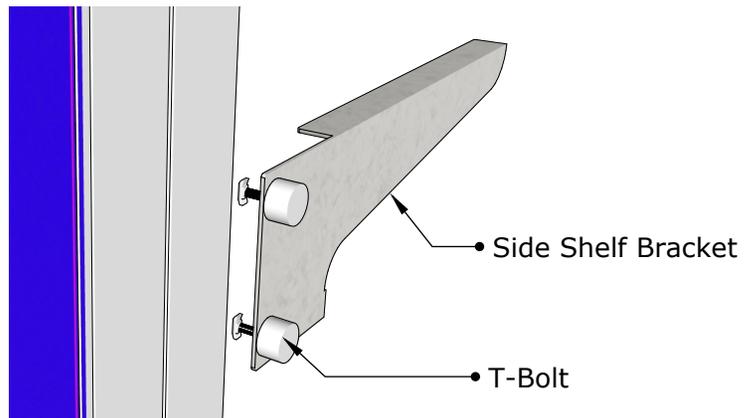

Install the shelf assembly by setting it on the shelf Brackets. **NOTE: Do not disassemble the support bar from the shelf.**
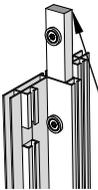

Part 3: Setup Bridge

1.) Place frame flat on the floor paring like numbers. Assemble sides with large center connector bar & small connector bars in center & outside channels respectively & tighten screws. Be sure to connect Barrel Electrical Connectors at each respective joint.
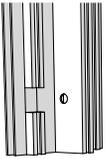

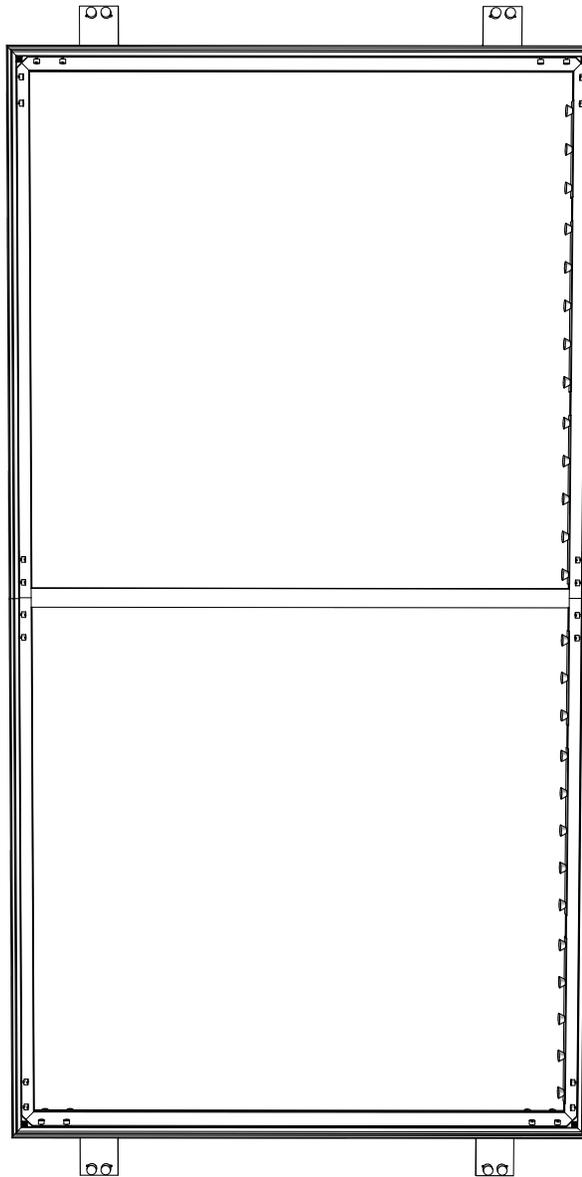

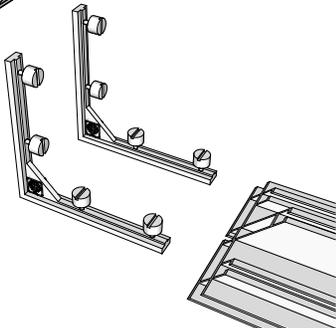

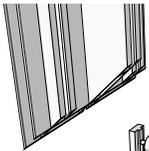

• Small connector bars

• Large connector bar

2.) Assemble corners using corner brackets inserted into outside channels of frame. Tighten thumb screws.

3.) Install Horizontal support bars into to marked location on frame and tighten Tension Lock

• Turn Tension Lock to the right with T-30 tool to tighenten lock into channel

4.) Attach Bridge brackets to the short side of frame using the provided thumb screws. Thumb screws should be placed in the outer holes of the bracket.
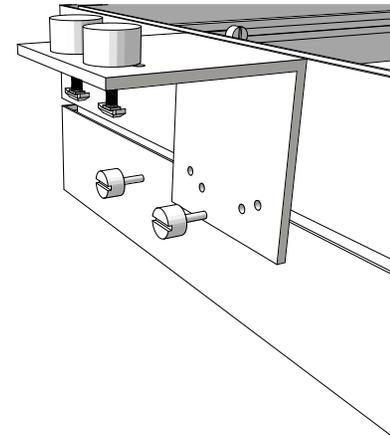

6.) Place SEG Graphic on the front and rear of the frame following the instructions on the last page of the instruction manual.

Part 4: Arrange Displays

1.) Place fully assembled Backwall into desired location at the rear of the booth space.

2.) Measure out approximately 90" from the front of the Backwall and place Front Display into desired location at the front of the booth space.

3.) Using two people, lift the Fully Assembled Bridge Display so that the brackets rest on the Backwall on one side and on the front display on the other. Secure the Bridge by inserting the T-bolts into the grove on the Backwall and Front Display and tighten to secure.
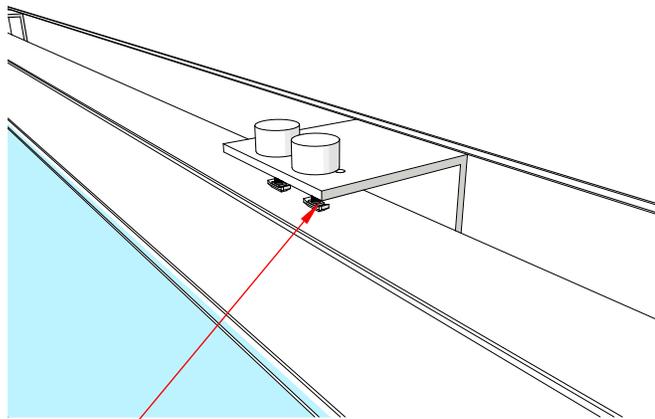

Insert T-Bolt into groove and secure by tightening thumb screw

Silicone Edge Graphics (SEG)
Installation Instructions into hardware

What are Silicone Edge Graphics (SEG)?

SEG are dye-sublimation fabric graphics with silicone strips sewn along the underside of the fabrics edge. SEG frames have grooves along their perimeter designed to snugly hold the silicone strips so the fabric can be stretched across the frame for a drum-tight fit.

Rubber beading sewn to fabrics edge

We recommend laying the frame on the floor, then draping the fabric graphic on top.

The following procedure ensures the silicone edge will be place evenly over the entire frame and NOT STRETCH or GROW at the corners. Once all the edges have been secured, you should have a taut fit with a smooth flat finish.
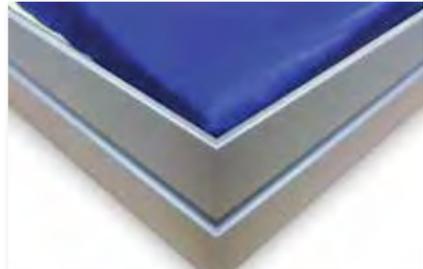

1: With Clean Hands,
Press SEG silicone edge first, into the corners of the frame.

INCORRECT WAY

CORRECT WAY

PRESS

Example: 36"x 36" frame
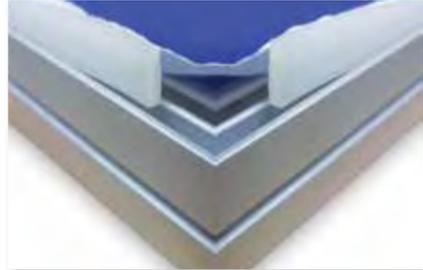

2: Working in Centers.
Go back and press the silicone edge into the center - on eachside of the frame.
EXAMPLE: A 20"x20" fabric/frame would be pressed in 8 locations.
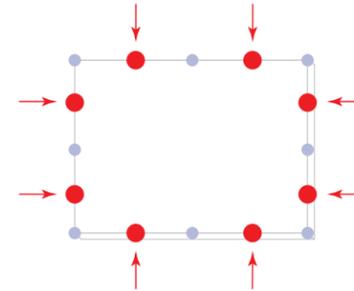

PRESS

Cont'd.

3: Working in Centers again,
Go back and press the silicone edge once again on each side previous center, on all 4 sides.

Repeat this process, (WORKING IN CENTERS) until the SEG fabric's edge is pressed aproximately every 6 inches apart.
EXAMPLE: A 8' x 8' frame (using this procedure) will have been pressed/tucked 15 times (not including corners) on each side of the frame.

PRESS

4: After all has been pressed into your frame using
this procedure, lightly tap your forefinger to smooth fabric between the tucks.

TAP INWARDS

CARE INSTRUCTIONS

Due to the fine quality, smoothness and weave of the fabric, great care must be taken to extend the life of your SEG fabric graphics.

We recommend very loosely folding your graphic, making sure there are no hard creases or folds or that the fabric doesn't catch on sharp obects.

Store in a clean bag.
A plastic bag or pillow case is ideal.
Graphics can also be spot cleaned with a damp cloth.

To wash entire graphic, use a commercial size front loading washing machine on gentle cycle with cool water. Do NOT dry clean.

You can also gently iron the back side using the Polyester setting of your iron.
