

# Wave Tube Modular 10FT Straight wall

## SETUP INSTRUCTIONS

**1**

### Assemble the Frame

Connect the poles by matching up the numbers. Attach support feet to the bottom of the frame.

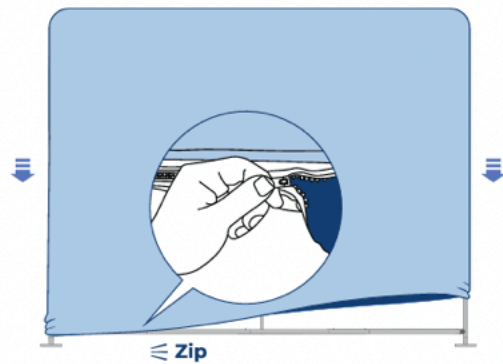

*Match numbers 1 to 1, 2 to 2, etc.*

**2**

### Install the Graphic

Carefully pull the graphic print over the frame, ensuring both sides are pulled down at the same time.

*It helps to have a second person to pull the other side simultaneously.*

**3**

### Attach LED Lights (Optional)

Attach light clips to the frame (knobs facing back) and tighten until secure. Slide LED lights into the top grooves.

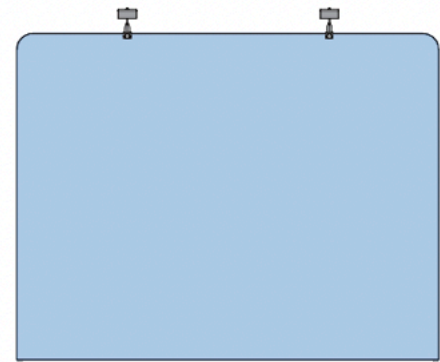

*To avoid stripping the light clips, do not twist the knobs too tight.*

**4**

### Align the Display

Stand up the frame and shift or wiggle the corners until it's aligned and standing straight. Plug in your lights and your display is ready for action!

*You can adjust the frame alignment by having a person on each side gently shift the top corners until the display stands completely straight.*
